

Carreaux : $12,5 \text{ cm} \times 12,5 \text{ cm}$

Salle

On laisse $1,50 \text{ m}$ soit 12 carreaux

$$46 \text{ c} = 5,75 \text{ m} \quad 50 \text{ c} = 6,25 \text{ m}$$

$$M = 50 \quad N = 46$$

$$MN + M + N - 1 = 2395$$

$$2395 \times 12,5 = 29937,5 \text{ cm} \approx 300 \text{ m}$$
